

FORMULAE TELL THEIR STORY-3

If you want to know some more...

In the previous activity we have used different procedures to count the cubes and we have arrived at a different expression from the formula for each used procedure.

Nevertheless, if the formulae are correct, **when making the indicated calculations** and **reducing the similar terms**, you should arrive at the same expression: **the formula's simplest way**.

✍ **Get it and check if all the given expressions and the ones you have got are correct.**

YOU WILL NEED:
Pencil and a blank sheet.
